

Memo

To: Mayor Morrison and Members of Council
From: Jackie Clark
Date: 10/12/2005

It is full steam ahead for the swimming pool this September. After a 3-week breather from swim lessons, the pool is back into full swing with lessons. Ute Pass swim lessons started again this week with 24 children taking lessons. This is our capacity for the number of children the pool can take for lessons at one time. Manitou lessons started in the middle week in September and it is at capacity also. The pool staff would like to thank the schools for all their support with the swim lesson program.

The Nova Team has started practice again with the Manitou Pool. They practice 4 times a week and will continue until June 2006. The Non-competitive team-The Mantarays has started practice in September. This is a great workout for children that want to improve their swimming and get some exercise during the year.

The Special Olympics of Colorado have made arrangements to use the Manitou Pool for practice in 2006.

The High School Mustangs are working with the pool for this season's practice schedule. The Mustangs will be practicing Nov.-March for the 2006 season.

The outdoor pool is scheduled to close October 10, 2004 for the winter. If you would like to get a little more sun before winter arrives the outdoor pool is very enjoyable at this time of year.

The weight-training program continues to be a huge success. The weight training class is now in the new weight room at the swimming pool. Another session will be starting Sept. 30, 2005. If you haven't seen the new weight training room, come on down. The Open House for the weight room was Friday-Sept. 23. The pool staff was very impressed with the turn out and the interest. Thank you everyone for your support with this adventure. The pool offers weight-training classes and Vikki is available for Personal Training Sessions if the class setting is not for you. We are interested in you and your well-being. Let us know if we could be any assistance to you toward your fitness goals.

The Pool has had a Fabulous year to date in 2005. The pool staff is looking forward to some great things to happen in 2006.

I would like to thank the staff at the pool for all their hard work and dedication to the success of the pool so far this year. Without them, none of this would have been accomplished. We have all been working together to reach our goals and it is showing.

Sincerely,

Jackie Clark

Aquatic Director
